

Standard executions		
Version	Symbol	Type
Standard		S1
Short (for light loads)		S2

Options		Suffix
Both connections on one head	from bore 25 mm.	U
Carriage with integral brake	(see page 1.26.35)	B
Special versions on request		/ S

The options can be combined (when this is possible).

For parameters of the loads and moments see from page 1.26.25.
For seal kits see from page 1.26.21.

Rodless cylinders, magnetic as standard.

Cylinders with direct power transmission through the tube slot onto the yoke. The new cushionings are adjustable at both ends; the flow rate is regulated from 0 to 100% by turning a pin of an angle of 90°. The new barrel with high resistance to deflection is provided with grooves for fixing various accessories.

The magnetic switches can be fixed by a bracket or directly in the tube; the reed switch will not protrude out the barrel profile.

The short cylinder type S2, in comparison to the standard cylinder - 0 - stroke, is up to 42% shorter; the total fitting length is therefore reduced and the cylinder is more compact and money-saving.

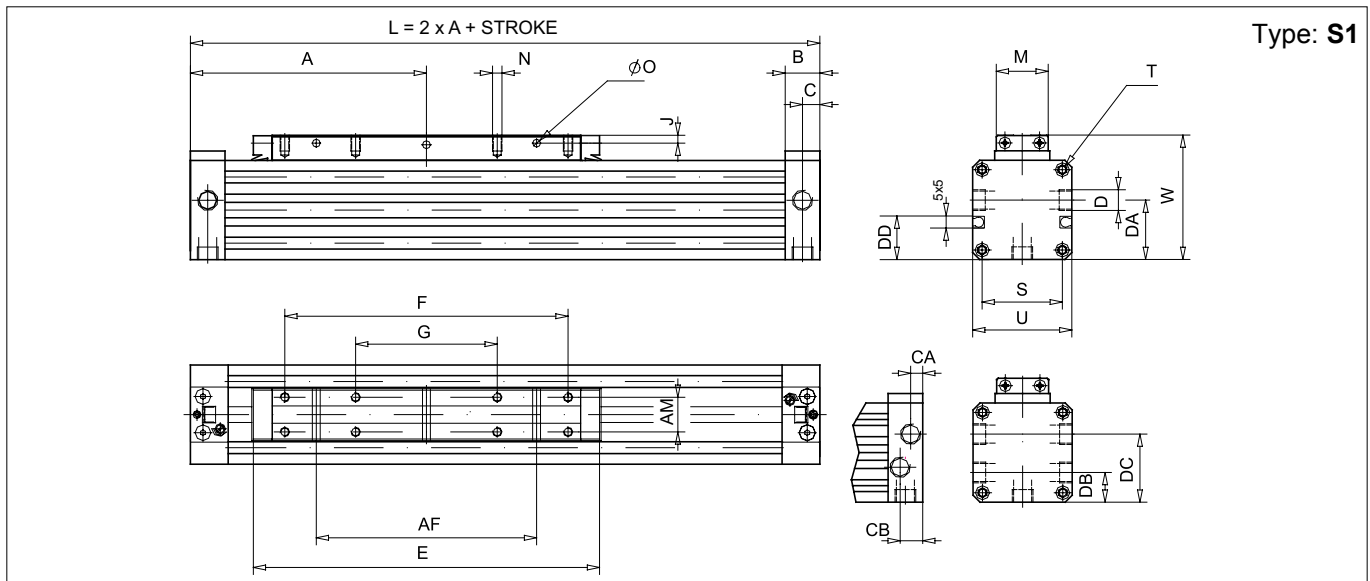

For the magnetic reed switches ASV-ASC see page 1.26.40.
For mounting accessories see from page 1.26.28.

How to order: 32 / 1000 S1U

32	/	1000	S1	U
Bore	/	Stroke	Type	Option

Technical data	
Fluid	Compressed filtered air with or without lubrication. Lubrication, if started, must be continued.
Pressure	2 ÷ 8 bar
Temperature range	-20 °C + + 80°C
Materials	Heads: Anodised aluminium Tube: Anodised aluminium Seals: Polyurethane - Piston: monobloc/yoke: Aluminium Internal strip: Nylon External strip: Stainless steel AISI 304 Raschiapolvere: PVC
